Application Serial No. 10/720,008
Attorney Docket No. 802930-0002

SUPPLEMENTAL REISSUE APPLICATION DECLARATION BY THE INVENTOR

As a below-named inventor, I hereby declare that:

My current residence, post office address and citizenship are as stated below next to my name.

I believe I am the original, first and sole inventor of the subject matter which is described and claimed in patent number 6,328,461, granted December 11, 2001, and for which a reissue patent is sought on the invention entitled **POOL TABLE DECORATIVE LIGHT**, the specification of which was filed on November 21, 2003 along with a preliminary amendment presenting new claims for examination in this reissue application serial no. 10/720,008. In addition, I believe I am the original, first and sole inventor of the subject matter which is set forth in the claims presented in an amendment filed on or about May 16, 2005 presenting further new and amended claims for examination in this reissue application as well as amendments to the specification and drawings.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge my duty to disclose information which is material to the patentability of this application in accordance with Title 37, Code of Federal Regulations, §1.56(a).

I verily believe the original patent to be wholly or partly inoperative or invalid, by reason of a potentially defective specification and drawing and by reason of the patentee claiming more or less than he had a right to claim.

Among the reasons relied on as basis for reissue is that the claims of the original patent recite literally that the invention comprises a kit for decorating a light assembly, that the light assembly is adapted for being hung from a ceiling by two cables, that the light assembly illuminates a pair of elongated fluorescent light bulbs, that the light assembly is elongated and has a top wall and a pair of ends, and that the light assembly is adapted for overhead suspension. These recitations might render the original claims partly inoperative by potential exclusion of structures other than those specifically described in the preferred embodiments of the invention. Also included among the reasons relied on as basis for reissue is that the original specification is ambiguous regarding the showing of the opening 31.

All errors which are being corrected in the present reissue application up to the time of filing of this declaration arose without any deceptive intent on the part of the undersigned applicant.

The original U.S. patent is not currently assigned.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States

Application Serial No. 10/720,008
Attorney Docket No. 802930-0002

Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
